

Powermax85 SYNC

Recommended cut capacity of 25 mm (1")

Severance capacity of 38 mm (1-1/2")

Professional grade

Part of the Powermax® family, the Powermax85 SYNC features advanced torch communication for automated setup and patented single-piece cartridges for hand cutting, mechanized or robotic cutting, or gouging.

Key business benefits

Simplify operations and boost productivity

Single-piece cartridge simplifies operations and dramatically reduces training time

Minimize operating costs

Up to 5x longer consumable life compared to competitors decreases operating costs

Reduce secondary operations

Improved cut quality over consumable life delivers better part consistency to reduce secondary operations

Powermax85 SYNC cut and gouge capacities

Cut capacity	Thickness	Cut speed
Recommended	25 mm (1")	500 mm/min (20 ipm)
	32 mm (1-1/4")	250 mm/min (10 ipm)
Severance (hand cutting)	38 mm (1-1/2")	125 mm/min (5 ipm)
Pierce*	20 mm (3/4")	
*Pierce rating for handhel	d use or with automatic torch height conti	rol
Gouge capacity	Metal removal rate	Groove profile
Typical gouge	8.2 kg (18.2 lbs) per hour	3.2 mm (.12") D x 6.8 mm (.26") W

	12.2 kW
Torch output**	85 A x 143 V ÷ 1000 W = 12.2 kW

^{**}Higher output voltage at the torch plus efficiently designed consumables result in a faster, cleaner cut.

Powermax85 SYNC. Easy to use. Versatile. Reliable.

For metal workers who want the most versatile system available to gouge and cut, Powermax85 SYNC delivers the best return on investment. It features a patented single-piece cartridge, greater cutting power than higher-amperage competitors, an automated system process set-up, and SmartSYNC® torches that provide trackable utilization data.

"We're very impressed with the machine's cut quality and love the cartridges. The cartridge life span far exceeds our older machine's consumables, and the cartridge takes seconds to replace."

Salt Creek Fab. United States

Our customers' preferred cutting tool for industries including:

- Job shops and general fabrication
- Truck and trailer fabrication
- Tank and vessel fabrication
- Railyard maintenance and railcar fabrication
- Demolition and metal salvage
- Agricultural/equipment maintenance

Highlighted product features:

Easy to use

- SmartSYNC® torches with the cartridge automatically set the correct amperage and operating mode, eliminating setup errors
- Easy to identify single-piece cartridges are color-coded by process to eliminate parts mix-up and simplify consumable inventory management
- End-of-life detection lets the operator know when it's time to change the cartridge
- Simplified operation minimizes downtime, troubleshooting, waste, and training time

Versatile

- Tackle a wide range of jobs with easily interchangeable torch styles and application-specific cartridges for various types of cutting and gouging
- Time-saving torch controls allow the operator to adjust the amperage on the fly and change cartridges and applications without returning to the power supply
- Access cartridge data for performance tracking and analyzing usage patterns

Industry-leading reliability

- Powermax plasma cutters are known to last decades in the field, minimizing maintenance and downtime
- Power supplies and torches are engineered for rugged industrial environments
- Each Powermax component is tested to perform reliably in demanding conditions

Specifications

CE – for use in Europe, Australia & New Zealand - RCM, Serbia, UK – UKCA,
Ukraine, and other countries where accepted.

CCC – for use in China

CSA – for use in the Americas and Asia, except China
